DETAILED ACTION

1. Applicant's election without traverse of Group III (claims 74-89) in the reply filed on 1/1/2006 is acknowledged.

Claims 74-89 are pending in this Office Action.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claim 74 is drawn to accepting a search term , which is classified in class 707, subclass 6.

II. Claims 75-89 are drawn to storing the navigation states in a data structure, which is classified in claim 707, subclass 3.

3. Inventions I, II, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, accepting a search term in invention I is used in matching attribute-value pairs for the search term. Storing navigation in a data structure in invention III is used to searching/retrieving a responsive precomputed navigation state. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2162

5. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
